ROBATECH AT XYLEXPO 2024

At this year's Xylexpo, Robatech is going to be present with an information and counseling booth from May 21-24, 2024. The international supplier of gluing equipment for the woodworking and furniture industry thus focuses on the importance of local presence rather than the actual products.

At the Robatech booth, customers can meet the local Robatech salespeople and speak to them, asking them all their questions concerning adhesive application. Unlike previous years, Robatech does not display any physical products this year, but is instead focusing on the importance of the human component in the business. They will take the time to be there for their customers, to listen to them, and to advise them.

The technical aspect, however, will not be neglected. But this time, Robatech is relying entirely on digital instruments to convey the technical content. There will be screens that show how the applications work. And of course, the salespeople will be happy to talk about Robatech's proven solutions for edge banding, large surface coating or 360° Gluing.

Robatech at Xylexpo: hall 3 / booth G06

ROBATECH

Robatech optimizes the industrial hot melt and cold glue application with sustainable and innovative adhesive application systems. Since 1975, Robatech has been developing and producing high-quality control systems, application heads, melters, and dosing systems that make gluing processes more environmentally friendly, safe, and straightforward. The Robatech Group, headquartered in Muri/AG, Switzerland, is represented in more than 80 countries. More than 670 employees worldwide provide personal and fast customer support in a wide range of industries.
