

PACK EXPO INTERNATIONAL 2022: FOCUS ON ENERGY EFFICIENCY

At PACK EXPO International in Chicago from October 23-26, 2022, Robatech will be demonstrating new ways of sustainable adhesive application. With this in mind, Robatech will present yet another product innovation.

The smart Vision melter, the fully insulated Performa heated hose and the SpeedStar Compact application head form a dream team for energy-saving and reliably precise hot-melt application on primary and secondary packaging. With this application system, it is possible to reduce energy consumption by around 30 % compared to similar systems.

The **Vision melter** keeps the adhesive viscosity constant and ensures a stable adhesive pressure. With the Smart Terminal – a new type of LED status display on the melter – the operating personnel can see even from a distance whether the gluing process is running smoothly or, for example, whether adhesive needs to be refilled. **Vision** is certified by MET and therefore complies with the relevant safety standards in the industry.

The **Performa heated hose** is quickly and easily connected to the application head and the melter using the PrimeConnect plug-in coupling in a plug-and-play process. And with the **SpeedStar Compact electric jetting head**, Robatech demonstrates the value of the automatic stroke control: The intelligent control electronics ensures precise application of millimeter-sized hotmelt dots and short beads – constantly and over the entire service life of 500 million operating cycles.

Robatech at PACK EXPO International, booth no. N-5217

ROBATECH

Robatech optimizes the industrial hot melt and cold glue application with sustainable and innovative adhesive application systems. Since 1975, Robatech has been developing and producing high-quality control systems, application heads, melters, and dosing systems that make gluing processes more environmentally friendly, safe, and straightforward. The Robatech Group, headquartered in Muri/AG, Switzerland, is represented in more than 80 countries. More than 670 dedicated employees worldwide provide personal and fast customer support in a wide range of industries.
