

MAKING SAVING POTENTIALS IN ADHESIVE APPLICATION VISIBLE

Under the motto «You don't need much. Just the right thing.», Robatech presents GreenSaver at PACK EX from November 7-9, 2023. The new service underlines the company's focus on sustainability and helps customers find the right measures to become more efficient in adhesive application.

Levers for more sustainability. GreenSaver is a service for customers who want to optimize their adhesive application systems in terms of adhesive consumption, energy and compressed air consumption, adhesive application, workplace safety and system availability. To this end, Robatech offers an on-site inspection of the adhesive application system, resulting in a detailed inspection report that points out effective levers for reducing costs and improving the sustainability balance.

Gluing made simple. Aligned with the focus on efficient adhesive application, Robatech will be presenting Easy at PACK EX. Easy is a small and simple adhesive melter. With a maximum melting capacity of 2.5 kg/h and a focus on basic functions, Easy offers an efficient gluing performance for hand and automated adhesive application in the usual Robatech quality.

Gluing at its best. Robatech will also show their gluing systems for highest standards in hot melt application on primary and secondary packaging. Here, too, the focus is on efficiency and sustainability. With 1 billion operating cycles, the Volta electric jetting head is not only durable, but it also operates without compressed air. The high switching frequencies of electric heads like Volta allow the use of hot melt stitching. This can reduce adhesive consumption by up to 50 %. In combination with the smart Vision melter and the fully insulated Performa heated hose, energy savings of up to 48 % can be achieved compared to similar components in the same category.

Robatech at PACK EX 2023, booth 2023.

ROBATECH

Robatech optimizes the industrial hot melt and cold glue application with sustainable and innovative adhesive application systems. Since 1975, Robatech has been developing and producing high-quality control systems, application heads, melters, and dosing systems that make gluing processes more environmentally friendly, safe, and straightforward. The Robatech Group, headquartered in Muri/AG, Switzerland, is represented in more than 80 countries. More than 670 dedicated employees worldwide provide personal and fast customer support in a wide range of industries.
