

WORLD FIRST FOR PRECISE FOLDING OF CORRUGATED CARDBOARD

Robatech presented its latest innovation for fast and precise folding of corrugated cardboard with the PerfectFold liquid creaser at CCE 2023 in Munich in March.

Depending on the type of corrugated cardboard, folding can bring with it problems such as fold breakage, gaps and fishtailing. PerfectFold, the Swiss manufacturer's patented liquid creaser for adhesive application systems, provides a solution. The contactless application of the SpeedUp creasing fluid on two folding lines enables precise folding of corrugated cardboard cut-outs with little effort. The soft fold lines completely eliminate fold breakage and enable high folding precision. Corrugated cardboard creased with PerfectFold provides precise inner dimensions so that inserts can be easily fitted into folding boxes.

SpeedUp creasing fluid increases process stability

Robatech uses the tried-and-tested Sempre 30 application heads for liquid application. The SpeedUp creasing fluid, which leaves no traces on the corrugated cardboard, was specially developed for PerfectFold. It can result in a marked increase in machine speed depending on the type and size of the corrugated cardboard. The reduced stiffness of the corrugated cardboard also reduces the time and effort required to set up creasing and folding tools. Process stability increases.

PerfectFold is easy to use and can be quickly installed in folding box gluers and inliners. The SpeedUp creasing fluid is now available from Robatech representatives in Europe and Turkey. Further representatives will follow.

ROBATECH

Robatech optimizes industrial hot and cold glue application with sustainable and innovative adhesive application systems. Since 1975, Robatech has been developing and manufacturing controls, application heads, melting and dosing systems that make gluing processes more environmentally friendly, safer and simpler. The Robatech Group, headquartered in Muri/AG, Switzerland, is represented in over 80 countries. More than 670 employees worldwide ensure personal and fast customer support in a wide range of industries.
