

GLUING HEROES AT PACK EXPO: INNOVATION MEETS COMMITMENT

At PACK EXPO LAS VEGAS from September 29 to October 1, 2025, Robatech is presenting themselves again as Gluing Heroes. The campaign focuses on the people and their commitment to their customers. However, their technological capabilities are also rather impressive. Developments like the brand-new Alpha adhesive melter demonstrate their innovative spirit.

New and exciting: Visitors can experience the Alpha adhesive melter live at PACK EXPO LAS VEGAS. The new melter impresses with >99% system availability and a melting capacity of up to 12.5 kg/h, making it a compact all-rounder for many packaging lines. From simple low-volume to demanding high-end packaging processes – the series offers high energy efficiency, smart control, and gentle adhesive processing for a production that is ready for the future.

Electric jetting heads determine the future of packaging

Another highlight at the booth is the Volta electric jetting head. Its integrated hot melt stitching function helps companies to reduce glue consumption by up to 60%, making it an ideal solution for both primary and secondary packaging. Thanks to its exceptionally long service life of 2 billion operating cycles and easy integration – without requiring external control – Volta sets new standards in efficient gluing technology for the packaging and processing industry.

The Volta electric jetting head was submitted for the **Technology Excellence Awards 2025** in the category «General Packaging & Processing» and made it to the finals. The attendees are encouraged to cast their vote for their favorite product in every category. Voting starts on Monday, September 22 and ends on Tuesday, September 30 at PACK EXPO LAS VEGAS.

ROBATECH

Robatech optimizes the industrial hot melt and cold glue application with sustainable and innovative adhesive application systems. Since 1975, Robatech has been developing and producing high-quality control systems, application heads, melters, and dosing systems that make gluing processes more environmentally friendly, safe, and straightforward. The Robatech Group, headquartered in Muri/AG, Switzerland, is represented in more than 80 countries. More than 670 employees worldwide provide personal and fast customer support in a wide range of industries.
