

ROBATECH AT PROPAK: GLUING SOLUTIONS FOR EVERY NEED

At Propak in Johannesburg, Robatech will exhibit their diverse gluing systems for the packaging industry. From March 11-14, 2025, visitors can gain an impression of their gluing options and get practical advice at the Robatech booth.

At the Propak trade show from March 11–14, 2025, Robatech will showcase adhesive application systems for different packaging needs. Besides the energy-efficient, high-end Vision melter and Performa heating hose, there is the updated Volta application head that allows to save up to 60% adhesive with the integrated stitching function. For manual applications such as custom shipping boxes, trays or similar cardboard products, Robatech will showcase the small Easy melter. This practical melter stands out due to its ease in operation and glue consumption tailored to simple adhesive applications.
