

GLUING HEROES AT PACK EXPO: YOU GLUE. WE CARE.

From October 18 to 21, 2026, Robatech will be exhibiting at PACK EXPO International in Chicago. At booth N-4932, Robatech's Gluing Heroes will be focusing not only on innovative technologies, but above all on their service expertise. Their goal is to simplify everyday production for their customers by avoiding downtime with reliable systems and fast response times.

At PACK EXPO International, Robatech will be presenting adhesive application systems that cover different performance requirements in the packaging industry: A **basic system** offering an attractive price-performance ratio is suitable for applications with minimal adhesive requirements, such as wrap-around packaging or trays. An **all-round system** enables adhesive savings of up to 60 percent with its integrated stitching function. This is used in a wide range of applications. And for **maximum performance**, Robatech offers a system that meets the highest standards of reliability and precision, especially for demanding primary packaging. There is a system to accommodate every performance requirement. The Gluing Heroes will be at the booth to discuss individual requirements, explain technical details, and identify specific optimization potential.

Innovation meets commitment

With "You glue. We care.", Robatech emphasizes its role as a reliable partner to the packaging industry. Local service technicians guarantee fast availability, and expert advice ensure that systems run reliably and production downtime is minimized. Because when seconds count, service counts.
