

YOU GLUE. WE CARE. ROBATECH AT PROPAK CAPE 2026

From October 27 to 29, 2026, Robatech will be exhibiting at Propak Cape in Cape Town at booth C22. Under the motto "You glue. We care.", Robatech will be focusing not only on innovative technologies, but above all on its outstanding service expertise. The goal is to measurably simplify everyday production for customers – with reliable systems, fast response times, and global proximity.

Celebrating 30 years of Robatech South Africa

Propak Cape 2026 also marks a special milestone for Robatech South Africa: 30 years in the Southern African market. Since 1996, the local team has supported customers with technical expertise, service, and application know-how – backed by the global experience of the Robatech Group.

At the center of Robatech's presence at Propak Cape 2026 are adhesive application systems covering a wide range of performance requirements in the packaging industry:

Basic model with attractive price-performance ratio: The smallest adhesive melter in the new Alpha series, with the proven Enduro heated hose and the robust SX and AX application heads, is suitable for applications with low adhesive requirements such as wrap-around packaging or trays.

Powerful all-round system: The Alpha M Pro adhesive melter, combined with the fully insulated Performa heated hose and the Volta electric jetting head, is a versatile solution for a wide range of packaging processes. Volta's integrated stitching function enables adhesive savings of up to 60 percent – without any additional control. This ensures greater efficiency and sustainability in everyday production.

For maximum performance: The Vision adhesive melter, together with the Performa heated hose and the SpeedStar electric application head, meets the highest standards of reliability and precision, especially for demanding primary packaging.

Live experience: the new Glue Experience Line

A special highlight is the newly designed **Glue Experience Line**: a demo line on which all

application heads relevant to the packaging industry are demonstrated live. Visitors can experience different application technologies in direct comparison here. At the same time, small giveaways are produced on the line, making innovative adhesive technology immediately tangible.

Experienced experts will be available at the booth to discuss individual requirements, explain technical details, and identify specific optimization potential.

Service as a success factor

With "You glue. We care.", Robatech emphasizes its role as a reliable partner to the packaging industry. Local service technicians, fast availability of spare parts, and expert advice ensure that systems run reliably and production downtime is minimized. Because when seconds count, service counts.
