

ROBATECH AT PROPAK ASIA 2022

From June 15 to 18, 2022, Robatech will show how primary and secondary packaging can be glued in an energy-saving, repeatable and reliable way at the ProPak Asia packaging and processing exhibition in Bangkok, Thailand. .

The new adhesive application system from Robatech advances reliability in the gluing of primary and secondary packaging to a new level. With the smart Vision melter, the fully insulated Performa heated hose and the fast SpeedStar Compact application head, the manufacturer reduces power consumption by up to 30% compared to similar adhesive application systems.

The **Vision melter** keeps adhesive viscosity constant and ensures stable delivery pressure. With the Smart Terminal – a new type of LED display on the melter – the operating personnel can see even from a distance whether the gluing process is running smoothly or, for example, whether adhesive needs to be refilled. The **Performa heated hose** is quickly and easily connected to the application head and the melter in a plug-and-play process. And with the **SpeedStar Compact electric jetting head**, Robatech demonstrates the value of automatic stroke control: The intelligent control electronics ensure the precise application of millimeter-sized hot glue dots and short beads – constantly over the entire service life of 500 million operating cycles.

Also on show at the exhibition: The new **Vivo 18 coating head**, which can be used to apply tear strips directly to an adhesive application on cardboard packaging and to produce silicone release liners cost-effectively.

Robatech at ProPak ASIA in Bangkok at booth AZ31 / Hall 101.

ABOUT ROBATECH

Headquartered in Muri, Switzerland, the Robatech Group is a leading global manufacturer of innovative and sustainable adhesive application solutions for industrial hot melt and cold glue applications. Robatech has produced and supplied high-quality controls, application heads, melting and dosing systems since 1975. Robatech representatives advise and support customers in 80 countries in a wide variety of industries around all questions and concerns regarding adhesive application and optimization of gluing processes.
