

## ROBATECH AT PROD&PACK 2025

*At this year's Prod&Pack trade fair in Lyon from November 18–20, 2025, Robatech will present innovative adhesive application systems that combine precision, cost efficiency, and sustainability. Visitors to booth 7-M32 will discover how modern solutions for hot melt applications can increase production efficiency while cutting operational costs.*

At booth 7-M32, Robatech will showcase its complete series of next-generation melters: Easy, Alpha, and Vision. The **new Alpha melter** impresses with >99% system availability and a melting capacity of up to 12.5 kg/h, making it a compact all-rounder for many packaging lines. From simple low-volume to demanding high-end packaging processes – the series offers high energy efficiency, smart control, and gentle adhesive processing for future-ready production.

Another highlight at the booth is the **Volta electric jetting head**. Its integrated hot melt stitching function helps companies to reduce glue consumption by up to 60%, making it an ideal solution for both primary and secondary packaging. Thanks to its exceptionally long service life of 2 billion operating cycles and easy integration – without requiring external control – Volta sets new standards in efficient gluing technology.

### **World-class folding without board cracking**

With the PerfectFold liquid creaser, Robatech demonstrates how corrugated board can be folded precisely and without cracking. By applying a special creaser liquid along the fold lines, the system reduces stiffness and enables clean, effortless folding – even at high speeds.

Robatech invites visitors to Prod&Pack 2025 in Lyon to experience these innovations first-hand. More information and free tickets are available at [\(landing page\)](#)

Robatech at Prod&Pack: Booth 7-M32 | November 18–20, 2025 | Lyon, France

## ROBATECH

Robatech optimizes the industrial hot melt and cold glue application with sustainable and innovative adhesive application systems. Since 1975, Robatech has been developing and producing high-quality control systems, application heads, melters, and dosing systems that make gluing processes more environmentally friendly, safe, and straightforward. The Robatech Group, headquartered in Muri/AG, Switzerland, is represented in more than 80 countries. More than 670 employees worldwide provide personal and fast customer support in a wide range of industries.
