

ROBATECH PRESENTS MODERN PUR ADHESIVE MELTER

Canduro 2 is Robatech's new PUR adhesive melter for 2/2.5 kg candles. It was specifically developed for melt-on-demand applications, is particularly maintenance-efficient, and is equipped with modern RCS electronics. Canduro 2 replaces the previous model RobaPUR 2 MOD and covers a wide range of applications with its modular design.

The new Canduro 2 adhesive melter offers many possible applications: as a premelter for pot filling, as a PUR adhesive melter for bead and dot application, continuous or intermittent coating application, as well as for applications with hand applicators or robots. Melt-on-demand technology (MOD) conserves the adhesive, as only as much as is currently needed is melted. The tank version is available for continuous adhesive consumption. Depending on the MOD melting unit, the melt rate is 5 or 8 kg/h. There are also process-specific configurations for edge banding and book spine gluing.

Comfortable PUR adhesive application

In the development of Canduro 2, particular emphasis was placed on intuitive operation and low maintenance requirements. All relevant components are easily accessible and simple to clean. The machine is operated via the host machine, a touch display, or mobile devices. Robatech even offers an application-specific software for edge banding. «With Canduro 2, we are setting new standards in the comfortable processing of PUR adhesives. The combination of modular design, low-maintenance components, and intelligent RCS electronics makes the melter a future-proof solution for our customers,» says Markus Meier, Product Manager at Robatech. The new PUR adhesive melter is available now. For further information and advice, contact Robatech directly.

ROBATECH

Robatech optimizes the industrial hot melt and cold glue application with sustainable and innovative adhesive application systems. Since 1975, Robatech has been developing and producing high-quality control systems, application heads, melters, and dosing systems that make gluing processes more environmentally friendly, safe, and straightforward. The Robatech Group, headquartered in Muri/AG, Switzerland, is represented in more than 80 countries. More than 670 employees worldwide provide personal and fast customer support in a wide range of industries.
